For other inks

Additive Applications Defoaming and defoaming Prevention of Bounce | solvent-based

JA-750 Defoamer (Undiluted)

Product Features

- JA-750X Stock Solution
- Used when printing on materials prone to flicking.

Specifications

Lotus form	Characteristics
1kg solvent can	mucus

How to use

- The amount added is 0.1~1 part per 100 parts of ink.
- When overprinting, add the same amount to the ink above to prevent scratching.
- Sufficient mechanical stirring is required during addition.

Notes

- Adding more than the specified amount is strictly prohibited.
- For safety precautions when using the product, please refer to the product's Safety Data Sheet (SDS).
- The contents provided in this information may be changed or revised without prior notice.
- When using the device, please thoroughly consider the conditions based on the evaluation results of the equipment and substrate actually being used.
