Additive Applications Promoting scleroticability | solvent-based

JA-E11 Curing Accelerator

Metallic (tin) catalysts.

A curing accelerator used when using slow-curing curing agents (JA-950, others).

Product Features

- Active ingredient 10%.
- It has a significant effect in promoting hardening.
- Compared to JA-E11, the curing promotion effect is milder, which helps reduce pot life (usable time).

Specifications

Lotus form	Characteristics
50g metal can	liquid

How to use

- The dosage is 1~2 parts per 100 parts of ink.

Notes

- Please note that the ink's pot life (usable time) will be shortened.
- For safety precautions when using the product, please refer to the product's Safety Data Sheet (SDS).
- The contents provided in this information may be changed or revised without prior notice.
- When using the device, please thoroughly consider the conditions based on the evaluation results of the equipment and substrate actually being used.
