

English Version (Japanese Translation)

screen ink

additive

For UV ink

Additive Applications Improved Adhesive Performance | UV-curable type

JAR-17 Adhesion Enhancer

Special monomer.

Suitable for all types of UV ink.

Product Features

- The goal is to improve adhesion to acrylic, PC, PVC materials, and offset printed surfaces.

Features

Adhesion

Recommended Printed Materials

Material

Vinyl

General plastic

Acrylic [PMMA]

Polycarbonate [PC]

Offset and gravure printing surfaces

Specifications

Lotus form

1kg Poly Bottles

100g Poly Bottles

Characteristics

liquid

How to use

- The dosage is 5~10 parts per 100 parts of ink.
Excessive addition reduces curing resistance.

Notes

- Please be careful as ink viscosity tends to decrease.
- For general precautions, please refer to the attached document "[UV ink](#)". Please refer to the detailed information in the "" section.
- For safety precautions when using the product, please refer to the product's Safety Data Sheet (SDS).
- The contents provided in this information may be changed or revised without prior notice.
- When using the device, please thoroughly consider the conditions based on the evaluation results of the equipment and substrate actually being used.
